Trees Not To Plant Invasive Species

Please do not plant trees that may become invasive and crowd out native trees of Pennsylvania.

- Norway maple, *Acer platanoides*, a common street and lawn tree that frequently escapes cultivation.

- Sycamore maple, *Acer pseudoplatanus*, a tall Eurasian tree invading urban and suburban woods in southern PA.. This is not the same as the Sycamore.
- Tree-of-heaven, *Ailanthus altissima*, grows throughout PA. Another immigrant from China introduced as an ornamental.
- Princess-tree, Empress-tree, *Paulownia tomentosa*, imported from China this purple-flowered tree has spread across southern PA by winged seeds.
- Siberian elm, *Ulmus pumila*, a fast growing tree reaching 50-70 feet high.
